BASIC-ABSTRACT:

A control device contains an investment fund control device containing an
information recording unit, an investment fund account former of clients, an
account analysis unit and a unit for processing of information for automatic
calculation of sums.

The system additionally contains a financial liability output device (2), a
financial liability recording device and a payment output device (5). A unit
(15) uses information of financial commitments to form a reserve fund for
absorbing of financial commitments at any moment.

USE - Automation of credit-accounting between financial institutions and
clients

ADVANTAGE - Effective control of funds with maximum attraction to business
concerns
